ADE Project

2020-1-TR01-KA226-VET-098418

THE IDEA

ADE project aims to contribute to maintaining the continuity of VET in the field of tourism by introducing digital VET opportunities. This will ensure that students get the most of their education and training and they are less affected by the Covid-19 crisis situation and the resulting disruption in the educational process.

The project results are aimed to be used by administrators, teachers, students and parents in the field of VET.

ABOUT THE PROJECT

Results

Set of guides for digital vocational education in the tourism sector - specifically tailored to the needs of principals, teachers, students and parents.

Virtual ADE advisor - an individualized space for improving digital qualifications and skills of the VET teachers.

Main aims

To introduce digital solutions for physical and architectural challenges, to break down qualification barriers in digital vocational teaching and to stimulate and allow social and cultural adaptation to digital learning.

”

Ready-made material with VET specific content is less developed and there is a strong call for the Commission and national public authorities to create a database with existing resources to be shared for free around Europe.
